Claim 3.6.1 in this paper should be replaced by the following statement;

Claim 3.6.1. *Let (X', L') be a reduction of (X, L). Then the nef value of L' is greater than or equal to $n - 2$ and $K_{X'} + (n - 2)L'$ is not big.*

Here we note that we need not to change the proof of Claim 3.6.1.
